

HB-2200 Robotic Arm Material Pulling and Cutting Machine

Model	2200	Voltage	110V/220V
Brand	Hongxin	Power	1KW
Name	Robotic Arm Material Pulling and Cutting Machine	Cutting Speed:	Touchscreen Adjustment
Cut Tool:	Hot/Cold Hot Cutting	Cutting Width:	Customizable, maximum 120cm
Cutable Materials:	Elastic tape, webbing, etc.	Cutting Length:	1m/1.5m/Custom Length

Application scenarios: materials that can be cut

Bungee rope

Gauze

Leather

Polyester

Wash label

Elastic band

Lace

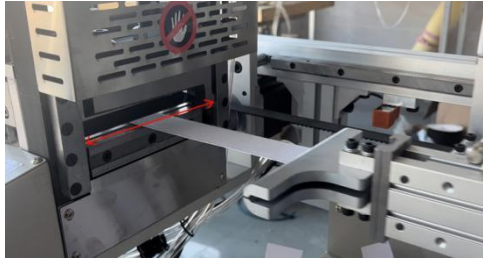

Lifting slings

Thin ribbon

Zipper

The cutting width of the machine blade can be customized according to customer requirements. We can customize different cutting widths such as 14cm, 20cm, 30cm, 40cm, 50cm, 60cm, 80cm, 100cm, and 120cm.

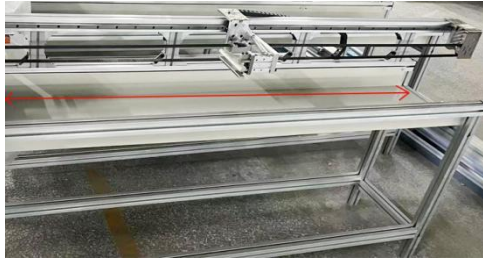

Depending on the customer's specific materials, we use different die-cutting structures. For example, for elastic ropes, nylon straps, and lifting slings, we use a single hot-cutting blade to ensure a good edge sealing effect. For gauze tape, lace, leather, zippers, etc., we use cold and hot cutting blades.

The touchscreen controls parameters for greater precision, allowing control over speed, cutting accuracy, and cutting time. The temperature controller adjusts the temperature up to 500 degrees Celsius, ensuring accurate temperature control and excellent heat-sealing results.

The robotic arm pulls and cuts materials, ensuring neat placement with zero error. It is widely used in industries such as elastic bands, thin ribbons, and gauze.

Cutting length can be customized according to customer requirements. Standard versions are available in 100cm and 150cm lengths, but we can also customize to 10 meters and 20 meters. Please consult customer service for specific requirements. We will work with our engineers to provide you with a good solution.

## FAQ

### 1. Who are we?

Our company is located in Shenzhen, China, and was established in 2011. Our products are sold to the domestic market (71.00%), Southeast Asia (6.10%), Northern Europe (4.50%), North America (4.00%), Middle East (3.30%), Eastern Europe (3.00%), Western Europe (2.80%), South America (2.30%), South Asia (0.90%), East Asia (0.89%), Africa (0.80%), Oceania (0.33%), Southern Europe (0.05%), and Central America (0.03%). We have 50 employees in our office.

### 2. How do we guarantee product quality?

Strict mechanical aging testing before shipment.

### 3. What can you buy from us?

Cutting machines, pipe cutting machines, slitting machines, automatic feeders, machine parts.

### 4. Why choose us instead of other suppliers?

Our company is a professional manufacturer of automated cutting equipment. We have obtained SGS and CE certifications, hold nearly 30 patents, and have been awarded the titles of "High-tech Enterprise" and "Guangdong Provincial Science and Technology Innovation Enterprise."

### 5. What services can we provide?

Accepted delivery terms: FOB, CFR, CIF, EXW, CIP, DDP, DDU, Express;

Accepted payment currencies: USD, EUR, JPY, CAD, AUD, HKD, GBP, CNY, CHF;

Accepted payment methods: Wire transfer (T/T), Letter of Credit (L/C), MoneyGram, Credit Card, PayPal, Western Union, Cash, Alipay;

Languages: English, Chinese
