

HB-988CHP Cold punching with Rotation angle hot and cold cutting machine

Model	HB-988CHP	Voltage	110V/220V
Punching diameter	The hole diameter can be customized as needed; cold punch	Power	1000W
Name	Cold punching hot and cold cutting machine	Number of punches	1-40PCS can set by screen
Cut Type:	Hot and cold , can cut 6 shapes	Cutting Width:	Max 40mm
Cutable Materials:	Velcro leather pvc	Cutting Length:	1-99999mm

Application scenarios: materials that can be cut

Velcro

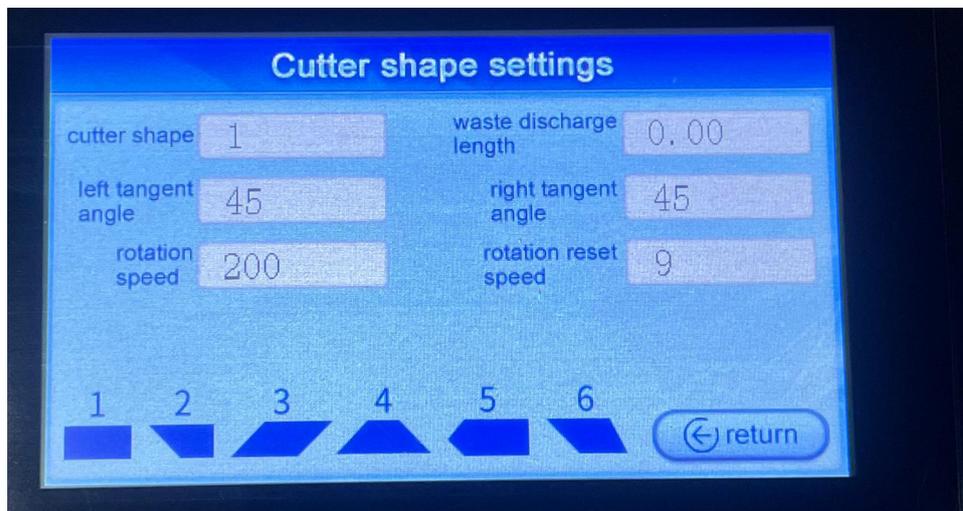

Leather

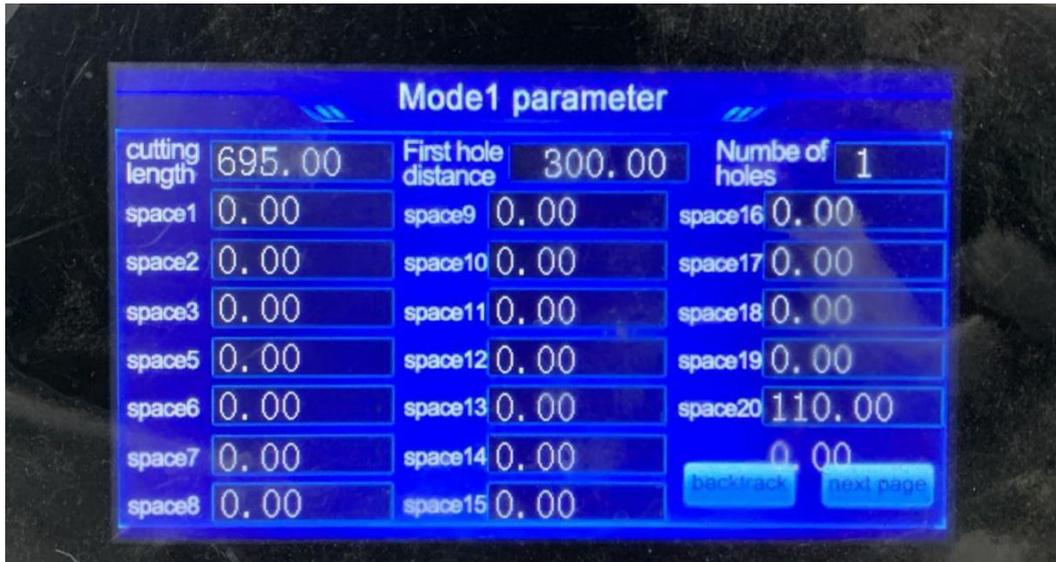

PVC

The punching function is cold punching, with a maximum punching diameter of 5mm. However, one set of molds can only punch one diameter. To punch different diameters, custom molds are required.

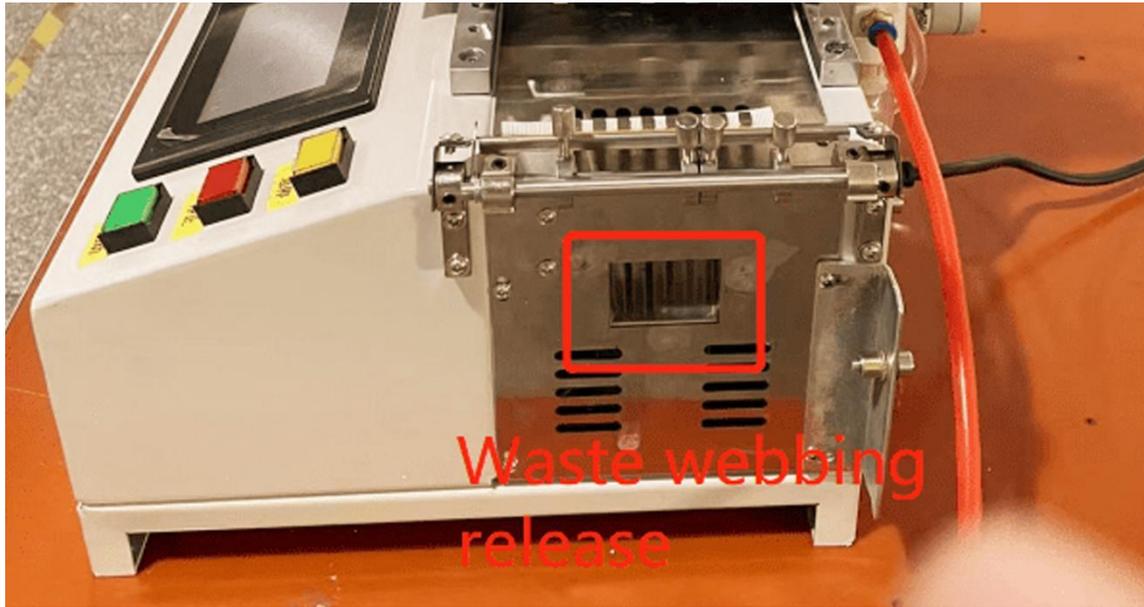

It can cut 6 shapes, and the cutting shape and angle can be set via the screen. It can also be used in conjunction with the punching function.

The maximum number of holes punched at one time is 40 pieces. The distance between holes can be set via screen parameters.

Speed and total length can be set via touchscreen.

Waste material from punching can be discharged through the waste discharge channel.
